Subject: NECO Conference Call Thursday December 8th at 10 AM

Folks,

Just a friendly reminder that we are scheduled for a conference call on December 8th. EPA will take care of arranging the conference call lines, a call in number, and a conference code. I'll make sure there are more lines to call into than there were on the last call.

If you could get any agenda items to Jennifer Jamison by Thursday December 1st, that would be appreciated.

I would like to propose an agenda item – Developments Regarding Perfluorinated Compounds (PFCs). I recently attended a 3 day training in Chantilly, VA, and there was an update on new EPA methods for PFCs. I'd be willing to share this with the group, and if any of the states would like to discuss and updates/analytical capability, certification of laboratories, etc., then that would be great too. Since I am proposing this agenda item, I'd be willing to take the lead on it for the conference call.

That's it for now, but please stay tuned for updates as we get closer to December 8th.

Happy Thanksgiving,

Steve
